Travel to matches together, reduce emissions and win attractive prizes: the first Carpooling Challenge organised by the Swiss Football League was a great success — and the second phase is now underway.

A friendly atmosphere, meaningful exchanges and an enjoyable journey to the stadium were among the feedback shared by participants after the first edition. Many fans used the SFL Carpooling platform to travel together to Brack Super League and dieci Challenge League fixtures.

Building on this successful launch, the second phase of the Carpooling Challenge has now begun. Until the end of the season, fans can register, offer a ride or join an existing carpool — actively contributing to reducing emissions and easing traffic congestion.

Attractive prizes await the most active participants, including VIP tickets, signed jerseys, official match balls and many other surprises.

Sign up now, select a match, share a ride and get rewarded: [Carpooling | Swiss Football League](#)

The Carpooling Challenge is organised in partnership with Toyota AG, Official Mobility and Carpooling Partner of the Swiss Football League.
