AccessiWay, a European leader in digital accessibility solutions, and Lega Pro have launched a new partnership rooted in inclusion and collaboration, marking the start of an important shared journey. The aim is to make news, information and insights from the Serie C world increasingly accessible, taking the first steps towards innovation through dedicated widgets designed to improve the digital user experience on Lega Pro's official website.

Accessibility is a regulatory obligation that all organisations must comply with under the European Accessibility Act, which entered into force on 28 June. Through this strategic agreement, Lega Pro and AccessiWay will work together throughout 2026 to promote a more accessible, modern and inclusive sport that responds to the needs of all users.
